
CityIQ Associates

To complement its own team of Consultants, CityIQ runs an Associate model. Over the years we have built up a network of talented individuals who prefer to work as independent consultants. All are subject matter experts. Some offer in-depth hands-on experience, while others offer the benefits of high-level senior strategic backgrounds.

As a CityIQ Associate you will be part of a growing group of City professionals: highly knowledgeable, independently minded individuals with a passion for providing the highest level of consulting services to clients in the Financial Services Industry.

We draw on our network of Associates to help us best fulfil our client assignment requirements. While working on an assignment with us we would consider you an ambassador for CityIQ. As such, the back office support we would provide for you during an assignment is exactly the same as that we provide for our own Consultants. As an Associate you would be contracted through your own Ltd company to CityIQ for a defined assignment.

Our Associates choose CityIQ as their partner in the City for a variety of reasons, including:

- our strength of reputation in a fiercely competitive market
- our strong long-term business relationships with our clients
- our market and industry knowledge
- joint marketing initiatives
- the support and resources of a well established company
- the opportunity to attend free industry cross-training events
- social networking opportunities with like-minded individuals

To be part of the CityIQ Associate Network you must be an independent consultant with significant, demonstrable, success in Financial Services. To join us, please send your CV to: resourcing@ciqresourcing.com. We will review your CV and, if we believe your skills and experience are a fit for our team, invite you to an introductory meeting. This meeting is an opportunity for us to get to know each other in person. There after, we will keep in regular contact about assignment opportunities, cross-training and social networking events.
